# Exercises
```

```
#1 Write a program to find the maximum and minimum between three numbers entered.
```

```
#2 Write a program to find tax on an entered amount of income
```

```
# 0 - $10000 - tax rate 13%
```

```
#$10000 to $50000 - tax rate 25%
```

```
#$ 50000 + - tax rate 37.5%
```

```
#3 Write a program that asks you for a password. If the password equals "Bear Creek", tell the user that they are correct. If the password is not correct, then tell the user that they are incorrect.
```

```
#4 Write a program that has the user enter their age. If they are over 18, output "adult", else output "not an adult"
```
